

INVENTORY MANAGEMENT WITH WI-FI BARCODESCANNERS

Accelerate your work and boost productivity using barcodescanners and ingenious.net for your inventory management. Acquire data using both optical scanning and RFID with instant access to your servers through your Wi-Fi network. The 8370 is ergonomically designed and built tough for hours of comfortable and safe use in the harshest environments, so you get more done in less time for less money.

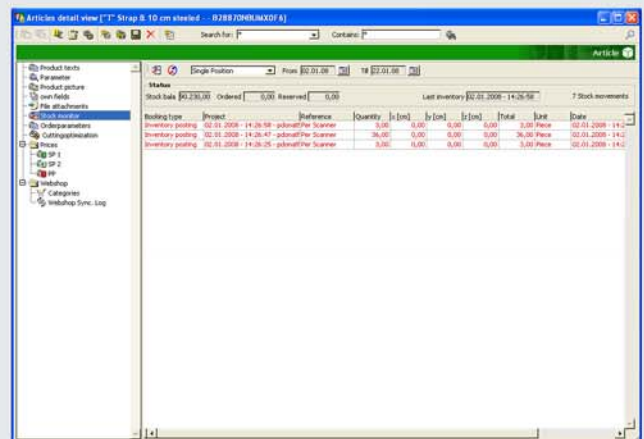

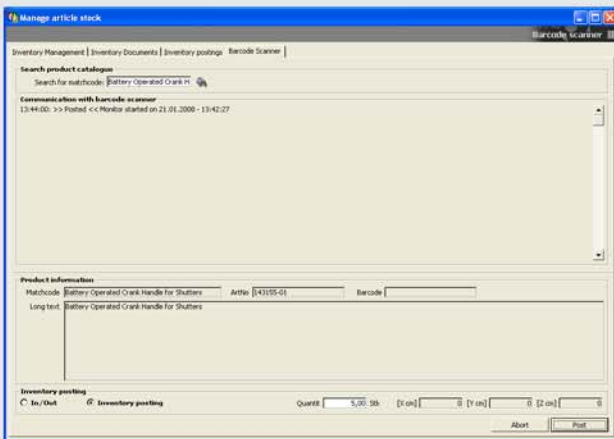

Details: IEEE 802.11b/g, 350-meter coverage, 40 hours Energy-efficiency

Example for an installation in a big German shutter manufacturing company

Ingenious.net receives the scanned article data with the amount and measurements typed into the barcodescanner.

The inventory booking will be displayed in every article. So everyone can check and all modules will be able to calculate with the supply.
